

Imaad Ullah Khan Yameen

Industrial Engineer | CAD Designer | FDM/FFF | Six Sigma Yellow & White Belt

imaadyameen125@gmail.com | github.com/Danger-Khan | Peshawar, Khyber Pakhtunkhwa, Pakistan

PROFESSIONAL SUMMARY

Industrial engineering graduate (BSc, UET Peshawar, CGPA 3.75/4.00) working across mechanical design, manufacturing process improvement and applied software. Experience spans SolidWorks mold and fixture design, FDM/FFF additive manufacturing, CNC machine operation and calibration, Lean Six Sigma process work, and GIS/remote sensing analysis. Designed and built an autonomous UAV inventory system that improved warehouse inspection efficiency by 25% at a Pepsi Cola franchise bottling plant, and a circular-economy rPET recycling system with a custom extrusion architecture. Also the sole author of an eight-module technical portfolio of working software — a Python-to-four-language compiler, an offline STL viewer with a from-scratch WebGL renderer, NLP and image-processing models, and a browser game engine — every one implemented without third-party libraries.

TECHNICAL SKILLS

Engineering & Design Software: Fusion360, SolidWorks, Arena Sim, AutoCAD, Ultimaker Cura, Prusa Slicer, Orca Slicer, Bambulab Studio

Analysis & Project Management: MS Office, Minitab SPSS, Matlab Octave, MS Project, Primavera P6

Software & Programming: Python, JavaScript, SQL, Perl, VS Code, Git

Creative & Media: DaVinci Resolve, Canva Affinity, Adobe Illustrator, Snapseed

Methodologies: Observation Skills, Analytical Skills, Leadership, Team Management, Project Management, Mechanical CAD/CAM, Designing, Editing, Programming, Computer Skills, Quality Assurance, Lean Six Sigma, Quality Control, 3D Printing, Data Ethics, UAV Operator

WORK EXPERIENCE

GET Engineer

Pakistan Engineering Council (PEC) | Peshawar, KPK, Pakistan · On-site September 2026 - Present

- Learning & training on soft skills in the PGMI Hayatabad Phase IV program, Peshawar, KPK, under PEC-appointed soft skills trainers.

Key skills: Communication, Team Leadership

Exam Investigator

BISE Peshawar | Peshawar, KPK, Pakistan · On-site May 2026 - May 2026

- Conducted the BISEP HSSC I & II Examination duties and activities.
- Performance monitoring and ensured safe conductance of examinations.

Key skills: Critical Thinking, Investigation

Graduate Engineering Trainee

PCSIR | Peshawar, KPK, Pakistan · On-site April 2026 - September 2026

- GET placement program by PEC at PCSIR Peshawar.
- Operated FDM 3D printers — operations, functions, and project-related tasks.

- Worked in the CNC workstation on calibration, maintenance, and observation of VMC machines.

Key skills: Finite Element Analysis (FEA), Critical Thinking

Computer-Aided Design Designer

SK Engineering & Manufacturing | Jaloza Industrial Zone, Pabbi, KPK, Pakistan · On-site January 2026 - January 2026

- Worked as a SolidWorks CAD designer on mold design and material gauge design.
- Designed precise molds for industrial injection molding systems; validated production quality using custom "Go/No-Go" gauges.

Key skills: Critical Thinking, Team Management

Production, Inventory & Finance Manager

Jhagra Tailor & Clothings | Peshawar, KPK, Pakistan · Seasonal May 2018 - May 2019

- Managed the shop across three functions: production, inventory, and finance.
- Handled financial management and resource management as shop manager.
- Oversaw inventory control and inventory management; performed financial analysis.

Key skills: Decision-Making, Inventory Control, Financial Analysis

INTERNSHIP & PROJECT LEADERSHIP EXPERIENCE

AI Agent Internship Internee

Pak Angels | Pakistan · Remote August 2026 - Present

- Worked as an AI agents learner, observer, and developer across multiple LLMs — ChatGPT, Gemini, Claude, and Grok.
- Built with Streamlit and Gradio web app platforms; participated in hackathons and entrepreneurship activities.

Key skills: Programming, Python

GIS & Remote Sensing Intern

AI Geo Navigators | Islamabad, Pakistan · Remote July 2026 - September 2026

- Learned GIS, Google Earth Engine, remote sensing, AI/ML, hazard control, and risk assessment.
- Completed Task #1: Pakistan Population Index, and Task #2: "Pakistan Population vs. Land Surface Temperature Dashboard" in Google Earth Engine.

Key skills: Critical Thinking, Remote Sensing

FYD Project Head

Northern Bottling Co. (Pvt) Ltd. — Franchise of Pepsi Cola International | Peshawar, KPK, Pakistan · Hybrid
September 2024 - August 2025

- System optimization: spearheaded the analysis and implementation of a plan that improved inventory inspection efficiency by 25%.
- Process automation: engineered and programmed an automated UAV system to replace manual warehouse counts, reducing human error.
- Leadership: led a cross-functional team to streamline routine industrial checkups through advanced tracking and system automation.

Key skills: Analytical Skills, Finite Element Analysis (FEA)

Management & CNC Internship

SK Engineering and Manufacturing | Peshawar, KPK, Pakistan · On-site July 2024 - September 2024

- Gained practical experience of theoretical coursework on related processes including CNC machines and inventory control.
- Implemented Lean principles to eliminate operational waste; standardized workflows using Job Cards and Machine Control Cards.

Key skills: Analytical Skills, Six Sigma

Society Deputy Design Head

IISE Student Chapter, UET Peshawar (Jalozai Campus) | Jalozai, Pabbi, KPK, Pakistan · Hybrid September 2023 - July 2025

- Led visual and technical design within the Institute of Industrial and Systems Engineers (IISE) student chapter.
- Spearheaded high-impact digital assets and technical layouts for departmental initiatives and professional events.
- As Inspection Designer, applied industrial engineering principles to develop standardized evaluation frameworks and quality control checklists.

Key skills: Critical Thinking, English

Management & Mechanical Intern

Dewan Cement Limited | Harnai District, Pakistan · Hybrid June 2023 - August 2023

- Worked as an internee for observation and data collection across different sectors of the plant.
- Gained knowledge of the cement manufacturing process, pyro processing, and energy audit practices.

Key skills: Critical Thinking, Meteorology

Electronic Interne

Universal Electronics, Peshawar | Peshawar, KPK, Pakistan · On-site February 2020 - April 2020

- Interned to understand and experience different types of electronics and their functions.
- Learned to diagnose and troubleshoot common issues in electronic devices.

Key skills: Critical Thinking, Electronics Repair

ENGINEERING PROJECTS

rPET Recycling System (Recycling)

Engineered a circular economy mechanical recycling system, designing a custom extrusion architecture that reclaims PET plastic into 3D-printing filament.

Focus: Green Environment, Recycling, Reuse, 3d printing

UAV Inventory Control System (+25% EFFICIENCY)

Developed an autonomous UAV system to automate large-scale warehouse inventory tracking. Integrated Python-based navigation to replace manual counts and minimize human error.

Focus: Python, Automation, Industry 4.0

Tailoring Shop ERP System (Python)

Built a custom ERP system in Python for Jhagra Tailoring & Clothing Center, digitizing order tracking, customer measurements, and inventory for a real retail tailoring business.

Focus: Python, ERP, Small Business

Population Distribution GIS Analysis (ArcGIS)

Conducted population distribution and demographic mapping analysis in ArcGIS as part of AI Geo Navigators, translating raw census and spatial data into actionable geographic insight.

Focus: ArcGIS, Population Mapping, AI Geo Navigators

GIS & AI/ML Remote Sensing Projects (GEE + Colab)

Delivered GIS and AI/ML projects on real-life data and tasks with AI Geo Navigators, using Google Earth Engine for satellite data processing and Google Colab for model training and analysis.

Focus: Google Earth Engine, Google Colab, AI Geo Navigators

ESP32 Weather Monitoring Station (IoT)

Programmed an ESP32-based weather station in Arduino IDE, publishing live sensor readings to an MQTT broker for real-time remote monitoring.

Focus: ESP32, MQTT, Arduino IDE

TECHNICAL PORTFOLIO (SOFTWARE BUILT FROM SCRATCH)

An eight-module portfolio of working software, written without third-party libraries and runnable offline. Source at github.com/Danger-Khan.

Py Compiler

A working compiler for a subset of Python: hand-written lexer, recursive-descent parser, multi-pass type inference, and four independent code generators targeting JavaScript, C, Java and Go, with Python-correct modulo and floor-division semantics preserved in every target.

CAD/CAM/CAE portfolio and STL viewer

SolidWorks design work including a 42-part filament recycler and an injection mold for PCSIR, published with an in-browser 3D viewer built from scratch — an STL parser, a WebGL renderer and a software rasteriser fallback, with no 3D library.

AI & ML models

Regression (least squares, polynomial, multiple) scored on held-out splits, lexicon sentiment analysis, a word-class slicer, k-means colour extraction, and a coordinate MLP trained in-browser with hand-written backpropagation.

Web game engine

A fixed-timestep browser game engine and six games built on it, with procedurally drawn artwork and synthesised audio rather than asset files.

EDUCATION

BSc Industrial Engineering

UET Peshawar | Sept 2021 - Aug 2025 | CGPA: 3.75 / 4.00

CERTIFICATIONS

36 industry certifications across 14 areas. Full verified list at github.com/Danger-Khan.

Lean Six Sigma (9): Essence of Lean Six Sigma; Lean Six Sigma Statistics in Manufacturing; Lean Six Sigma for Industrial Professionals; Certified Lean Six Sigma White Belt; Six Sigma Yellow Belt; Six Sigma Tools for Improve and Control; Six Sigma Tools for Define and Measure; Six Sigma Principles; Six Sigma Tools for Analyze

Lean Manufacturing (6): Lean Fundamentals; Introduction to 5S Concept; Total Productive Maintenance; The Lean Committee; Single Minute Exchange of Die (SMED); Value Stream Mapping (VSM)

CAD Designing (3): Solidworks MasterClass; SOLIDWORKS Advanced Sketching & Reference Geometry; SOLIDWORKS Foundations: Sketching & Extrusion

Climate & Sustainability (3): Climate Risk Screening for Development Planning; Climate Risk Assessment and Resilience Planning; Life Cycle Assessment

Quality Management (3): ISO 9001 QMS for SMEs; Essence of 8D Problem Solving; ISO 9001:2015

Supply Chain (3): Sustainable Supply Chain Management; Introduction to Supply Chain; Supply Chain Planning

Manufacturing (2): SLA 3D Printing; 3D Printing

Automation & Robotics (1): How to Get Into Robotics

Enterprise Systems (1): Becoming an SAP Professional

Project Management (1): Agile Project Management

Safety Standards (1): Health and Safety

Simulation & Analysis (1): FEM - Linear, Nonlinear Analysis & Post-Processing

Structural Design (1): Master Structural Design of Buildings

UAV Management (1): Drones for Environmental Science
